18. Because the Internet is a global communication tool, and we have clients from nearly every country in the world it is difficult to dictate what is considered "adult material." However, it is not our function to discriminate against those who choose to utilize adult content or adult related material. This being said, there are still several reasons why EasyNet Interactive has been forced to create its no adult sites policy for its virtual server users.

19. EasyNet Interactive may temporarily deny service or terminate this Agreement upon the failure of Account Holder to pay charges when they become due. Such termination or denial will not relieve the Account Holder of responsibility for the payment of all accrued charges, plus reasonable interest and any collection fees.

What does EasyNet Interactive consider "Adult Material?"

Any site whose revenue is gained in part or whole from its adult content.

Photos or videos showing frontal nudity on either men or women for non-scientific or non-artistic purposes.

Revenue-generating hyperlinks to sites who violate policy #1.

Why does EasyNet Interactive have this policy?

Bandwidth and Resources

A virtual server is a shared environment where many servers reside on each particular machine. This being said, consider that an average "adult site" gets more hits than 100 standard websites. Some of the smaller adult sites get around 5 GB of transfer per day. With these types of resources being utilized, our servers would be severely slowed if we allowed these high traffic sites to also reside on our servers. On top of that, we would be forced to raise our prices to pay for the additional bandwidth. We strive to keep our servers fast and inexpensive, and our bandwidth clear; therefore, adult sites are not an option.

EasyNet Interactive reserves the right to decide what it considers "adult content", "adult material", "sexually explicit", or "sexually related". Let us know if you are unsure of the approval of your site before placing an order.
